

AB534G 34m Fall Arrest

The AB534G is a retractable fall arrest device. Should a fall occur, the steel cable is pulled out at an accelerating rate; when a speed of 1.5m/sec is reached, the braking system activates, thereby arresting and cushioning the fall. When the load is released the cable automatically retracts back into the fall arrester. The AB534G can be mounted vertically above the user or horizontally, in conjunction with a suitable anchorage point.

Product Code:
AB534G

Conformance:
EN360

Stopping Distance approx. 0.6m to 1.0m

Length: 34m

Cable Material: Galvanised Steel

Weight: 21kg

Max Recommended User Weight:
136KG

Lifespan:
The maximum lifespan of the product is *10 years* from the recorded first use. The type of use and the conditions will affect the lifespan of a product.
