

## 0940 GEAR LOOP

Webbing gear loop that can be fastened on any harness (webbing width from 35 to 45 mm).

Easy fastening by means of the velcro closure.

It can carry gear up to 5 kg or be used to clip the lanyard's connector when not in use (the gear loop releases the connector in case of any major stress, in order to avoid any danger caused by unintentional clipping of the lanyard).

Maximum load: 5 Kg

Breaking load: 15 Kg

Warning: dirty velcro tape can decrease breaking load.

Installation on  
the harness

Use as lanyard's  
connector loop
