

1317 CABLE FALL ARRESTER

Auto-locking fall arrester for use on d.8 mm stainless steel cable.

The device trails the user during the ascension/descent and locks automatically in the event of a fall.

To be used together with a shock absorber (ref.102901) and two connectors (ref.0981).

CE EN 353/2

PYLONS/INDUSTRY

Hole to secure the device to the connector by means of a cord

Locking cams which arrest the descent along the cable in the event of a fall

Hole for the attachment of the connector. Once the connector is inserted, the device can not be removed from the cable; for best safety.

All made by stainless steel for best strength and corrosion resistance
