

ANCHOR STRAP

Anchor straps have a tough job, and see a lot of wear and tear. Over the years, we’ve learned that cuts and abrasion are the greatest threats to their safety and service life. To dramatically increase both, our Anchor Straps now feature two layers of the same durable mil-spec, resin-coated nylon web. Sewn by our highly skilled workers who make our rescue harnesses, our Anchor Straps feature forged steel D-rings individually proof loaded and sized for easy choker (girth-hitch) configuration when desired. Sewn-on web keeper allows for improved organization when stowed. Use our sized Anchor Strap Sleeves for added edge and abrasion protection.

Note: We recommend using a Delta Quick Link connector (part #382121) to prevent possible tri-axial loading of a carabiner when used in a basket configuration.
