

AZZARD TOWER CLIMBING CONNECTOR

Reed Thorne of Ropes That Rescue designed this connector to perform as a quick, one-handed attachment to a structure for maximum safety when placing belay protection. It provides quick connections to towers and other structures when protecting an ascent using a lead-climbing technique. The custom-designed aluminum ring reduces weight and provides a wide, smooth-bearing surface for the rope. The 1-in (25 mm) web has red wear indicators for easy inspection. The double-locking carabiner gate can be opened with one hand. Exceeds OSHA minimum strength requirement of 22.2 kN (5,000 lbf) for anchorage connectors.

Working-At-Height / Industrial Rope Access / Technical Rope Rescue

Working at height requires reliable, quality equipment. The Azzard Tower Climbing Connector can be used with confidence in work-at-height maneuvers for industrial rope access or technical rope rescue when used in accordance with the regulatory safety standards it falls under. Always use life safety equipment and gear according to the regulatory safety standards for which it is classified and/or certified.

Option	24 Inch
Item	201828
PRODUCT WEIGHT	9 OZ (255 G)
LENGTH	24 IN (61 CM)
