

CEARLEY RESCUE STRAP™

A CMC Exclusive

Rick Cearley, a retired senior helicopter pilot for the Los Angeles County Fire Department and inventor of the LSP Cinch Rescue Collar, identified the need for a product to rapidly secure a victim under difficult conditions, such as swiftwater rescues. Despite its simple appearance, this Cearley original design has features developed through years of field use by Los Angeles-area firefighters and rescuers.

Why You Need a Rescue Strap

All firefighters should consider carrying a Cearley Rescue Strap in their turnout because of its many applications to quickly secure a downed firefighter who must be dragged, lifted, or lowered. It can also be used as a hasty chest harness to pluck victims from above-ground windows or during swiftwater operations, or even as an emergency harness for self-rescue from upper floors. It has proven itself with our department when lives depend on quick and simple securing of victims for evacuation. — Battalion Chief Larry Collins, Los Angeles Country Fire Department, Urban Search & Rescue Company

PRODUCT WEIGHT	9.9 OZ (271 G)
LENGTH	60 IN (152 CM)
COLOR	YELLOW
STRENGTH RATING	35 KN (7,868 LBF)
Price	\$57
