

CMC/ROCO UNIVERSAL ONE-PIECE HARNESS

If your job requires versatility in order to adapt to a variety of situations or you just want a harness that incorporates designs for comfort and safety and meets ANSI and NFPA requirements for a full-body harness, the CMC/Roco Universal is for you. A harness for rescue, and fall protection, this one-piece harness is lighter and easier to don and doff, which appeals to emergency responders who must act quickly. The side positioning D-rings are a welcome addition, especially for those who work on rope. Wearers benefit from the comfortable waist and leg padding. The larger front D-ring accepts up to three rescue-size carabiners. Improved gear loops and our unique Web-Keepers™ for the web tails also make this harness unique.

Note: This harness model has been discontinued. Availability is limited to stock on hand.
