

CONFINED SPACE HARNESS[™]

The all-around choice for confined space operations, heavy rescue and USAR incidents, our ANSI-rated Confined Space Harness[™] is exceptionally comfortable, even when used for a shoulder lift. The molded waist padding with lumbar support and breathable D3 cloth provide industry-leading comfort. The redesigned buckle system and our unique Web Keepers[™] provide ease of adjustment while keeping the web tails in place. Multiple attachment points include fall arrest points and shoulder lift points with a front waist D-ring for comfortable rappels. The mesh vest provides excellent breathability and keeps the shoulder straps organized to make donning easy. A handgrip has been added to the back for assisting the rescuer out of tight spaces. The harness has a radio pocket, a multi-use pocket and a zippered mesh accessory pocket, which is ideal for a small gas monitor. Attachment points: dorsal, front and rear waist, sternal, shoulders.

- Two ANSI Z359.11 certified lanyard attachment loops at waist
- UL Classified to NFPA 1983 Class III Harness and ANSI Z359.11
- Made in USA (of domestic and foreign components)
