

FIRE ESCAPE HARNESS

Designed to be worn during fire ground operations, the Fire Escape Harness uses Kevlar® brand fiber web for high heat and flame resistance and can be worn over bunker pants without compromising firefighter safety. If done with care, the harness can be left on over the pants when they are stored, so it can be donned simultaneously. The new, improved design is one size fits most. The soft connection loop in front stays out of the way when not in use and easily accepts carabiners or large snap hooks.

CMC recommends using the turnout manufacturer's approved belt loop and keepers to ensure the harness remains in place when the gear is stored.

PRODUCT WEIGHT	1.9 LB (850 G)
WAIST SIZE	26 - 56 IN (66 - 142 CM)
MATERIAL	KEVLAR
COLOR	NATURAL
NFPA RATING	CLASS II
Price	\$210
