

## LOAD RELEASE STRAP

Our Load Release Strap makes sizing and tying a load-releasing hitch dependable, fast and easy. Constructed from the same high-strength web and hardware as our Anchor Straps, the larger D-ring on the load end has enough space for multiple carabiners. The wide web and multiple wraps provide a high degree of control during release. The strap comes assembled with our red ProTech™ Oval Carabiner.

**Minimum Breaking Strength (MBS) Specifications**  
End-to-End Configuration: 30 kN (6,744 lbf)

<b>PRODUCT WEIGHT</b>	397 G (14 OZ)
