

LSP HALF-BACK EXTRICATION/LIFT HARNESS

A CMC Exclusive

An effective tool for vertical extrication from confined spaces, the LSPMiller Half-Back provides spinal immobilization complete with anatomically correct head support. Leg straps provide lower body support during a vertical lift. Six handles allow for easy maneuvering of the patient. Compatible with our Spreader Bar and the Miller Full Body Splint (each sold separately). Qualified to MIL-STD-45662 and MIL-I-45208A. Now improved with reinforced heavy-duty ballistic nylon and color-coded straps for ease of donning. Color: Yellow. Weight: 11 lb (5 kg) with back-stay and head harness. Vertical Lift Strap and Carrying case also available (sold separately).
