

LSP MILLER FULL-BODY SPLINT

The “Miller Board” has been used for years in CMC’s confined space classes and on rescues. Hook-and-loop straps allow rapid immobilization of a patient, yet are so secure and compact that the patient can easily be tipped and rolled to fit through tight or confined spaces or, if necessary, lifted vertically. The Miller Board can be used to extricate the patient, then tied into a litter for the evacuation. The split-leg design fits Stokes-type litters and allows each leg to be secured separately. X-ray translucent.
