

SEDONA SHOULDER HARNESS FOR ARIZONA VORTEX LEG BAGS

A new removable backpack carrying system for Arizona Vortex Leg Bags, the Sedona Shoulder Harness quickly attaches or detaches from the leg bag for extended carries into the backcountry or up long flights of stairs up high-rise buildings. The harness is constructed of high-strength Cordura® nylon with comfortable padded shoulder straps, sternum strap, back panel and waist belt, each lined with breathable cloth. Tension-Lock waist buckles at each hip make it a “cinch” to tighten the waist belt and hold the adjustment securely, yet allow for quick, easy release when needed. Order one shoulder harness for each leg bag.
