

## REFLECTIVE RIT LINE

Our high-visibility Technora<sup>®</sup> and polyester RIT Line features a strand of highly reflective 3M<sup>™</sup> material. The Technora strands provide high strength in adverse conditions. The line is supple enough to pack easily, but firm enough to feel against the floor when following it in low-visibility conditions while wearing gloves. Technora chars at 482° C (900° F) . Polyester melts at 249° C (480° F) .

RIT Line is sold by the foot. Please contact Customer Support for maximum length available.
