

SPREADER BAR

The low-profile design of our Spreader Bar provides more working space with low ceiling clearance. The adjustable snap buckles allow an attendant to easily pull up on the straps and shorten the adjustment. Designed for use with CMC's Confined Space Harness. Maximum extension from shoulders to bar is 21 in.

Working-At-Height / Industrial Rope Access / Technical Rope Rescue

Working at height requires reliable, quality equipment. The Spreader Bar can be used with confidence in work-at-height maneuvers for industrial rope access or technical rope rescue when used in accordance with the regulatory safety standards it falls under. Always use life safety equipment and gear according to the regulatory safety standards for which it is classified and/or certified.
