

STATIC-PRO™ LIFELINE

do not absorb water, so there is no loss of strength or increase in weight if the rope gets wet. With less than 2% stretch at 300 lbf, Static-Pro is an excellent choice for high lines, long rappels, and many mechanical advantage haul systems. Polyester fiber ropes have better resistance to acids than nylon, which makes Static-Pro the preferred choice in acidic environments. Favored for its excellent hand, knotability and UV resistance, Static-Pro Lifelines come in solid colors with a single stripe to prevent confusion with CMC Lifeline and other solid color kernmantle ropes. Rope is sold by the foot. Rope ends are included. No charge on custom cutting. Specify desired lengths in order notes. Please

contact Customer Support for maximum lengths available. Static-Pro™ Lifeline Specifications

The following specifications apply to all diameters of CMC Static-Pro Lifeline:

Certification — UL Classified to NFPA 1983 Standard on Life Safety Rope and Equipment for Emergency Services, 2017 Edition.

Construction — Block creel, static kernmantle. Fiber - 100% High Tenacity Polyester (HTP).

Sheath — 32-strand braided, with half the strands having a left (Z) twist and the other half having a right (S) twist for a balanced, torque-free rope with maximum abrasion resistance.
