

## SWIVELS

Our anodized aluminum swivels are available in two sizes to allow users to select the strength, weight and dimensions best suited to their specific needs. Whether used in a rescue haul system, helicopter operations, or rope access, the addition of a swivel can help prevent system lines from wrapping around each other, while at the same time reducing spin caused by loading a free-hanging rope.

**Rescue Swivel** – Lightweight and high strength, this standard-size swivel for litter systems features symmetrical holes to accommodate multiple carabiners. High-speed, multi-axis CNC machining delivers a full-featured swivel at a reduced price for the best value in the industry.

**ProSeries® Swivel** – Designed to repeatedly perform at high loads, this larger swivel's special bearing supports a much higher working load than other swivels without damage to the bearing — perfect for heavy system loads. The larger size makes it compatible with helicopter short haul line equipment.

<b>Option</b>	Rescue
<b>Item</b>	300721
<b>PRODUCT WEIGHT</b>	125 G (4.4 OZ)
<b>LENGTH</b>	95 MM (3.75 IN)
<b>COLOR</b>	SAND / SLATE
<b>NFPA RATING</b>	GENERAL USE
<b>3 SIGMA MBS</b>	36 KN (8,093 LBF)
