

FASTLINK™ ANCHOR STRAP

The Fastest Connecting Anchor Strap Solution Available!

Standard anchor straps with D-rings on each end can create tri-axial loading on the connecting carabiner. A delta screw link connecting the two ends of the strap eliminates this hazard, but screw links are slow to fasten and add weight. We've eliminated the D-rings and solved both problems with this new design. Simply wrap the strap around the anchor point and clip the integrated ProTech™ Auto-Lock Carabiner into the included 12 mm Delta Quick Link, and you're ready to connect your system.
