

## ROPE & EQUIPMENT BAGS™

### IMPROVED!

With all the same refinements as our newly improved *rope bags*, the *Rope & Equipment bags* have been enhanced with all new features including accessory pouches now feature zippered closures for securing even the smallest of items, and a removable internal daisy chain loop for attaching connectors and gear.

Made of tough water-resistant 1,000-denier CORDURA® nylon, our proprietary Rope & Equipment Bags with multi-loop straps keep your rope rescue kit together, ready to go with everything in its place. The padded backpack-type shoulder straps make a fully loaded bag easier to carry. Your hardware stays together so that it can be pulled out of the pocket before you deploy the Rope & Equipment Bag as you would an ordinary rope bag.

These bags have proven themselves in the field and are now the standard pack on many fire department trucks and engines. Zippered pockets offer quick access to gear. Use the included Multi-Loop Strap to connect your hardware together, then use a carabiner (not included) to attach the strap to the loop inside the center pocket. Pocket dimensions: 6 x 20 in (15 x 51 cm).

The rope storage volume is the same for the X-Large and Large bags. Additional pockets on the X-Large size bag are designed to carry more web, edge protectors, harnesses, or anchor straps.
