

INSHORE 380N

RESCUE HYBRID LIFEJACKET

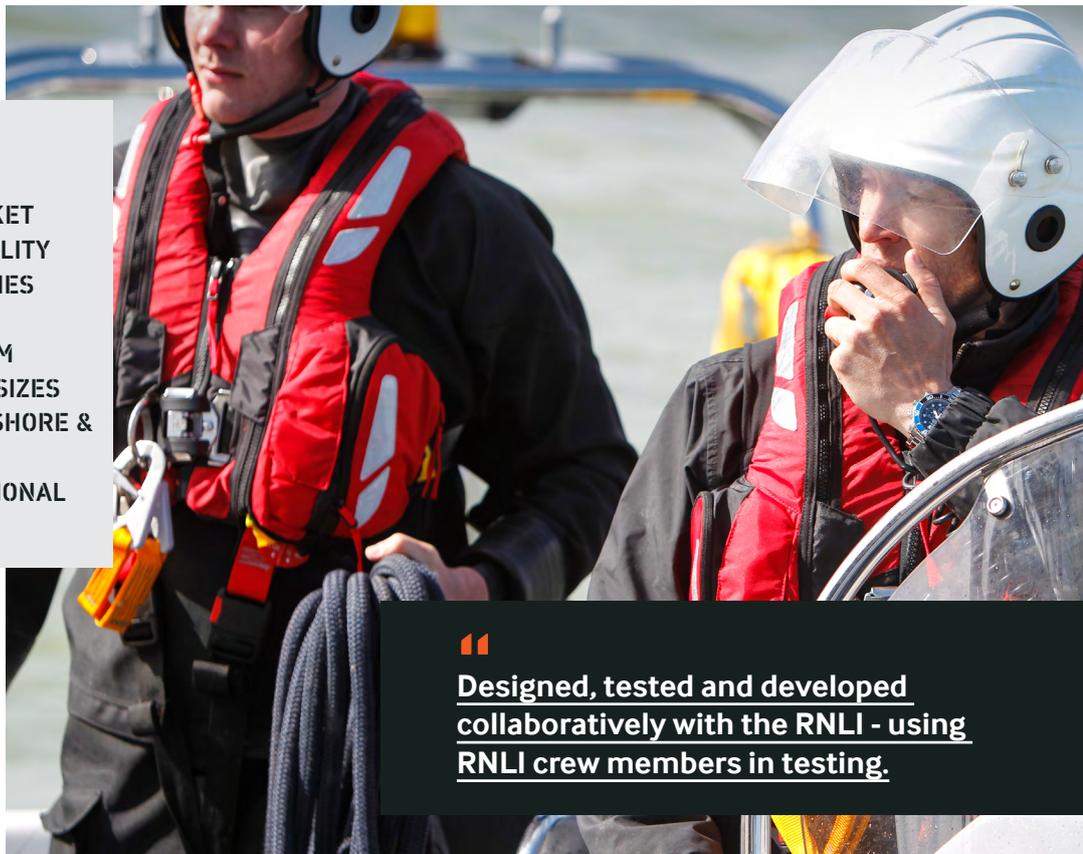

Often operating in severe weather conditions, the lives of rescue crews depend on proven and reliable safety equipment. The Inshore 380 N has been designed, tested and developed in collaboration with the Royal National Lifeboat Institution (RNLI), ensuring it is suitable for rescue boat crews of inshore lifeboats or advanced powerboat users.

A waistcoat style, the Inshore 380 N has open sides and a versatile adjustment system allowing it to fit most adults. It features 90 N of permanent buoyancy, provided by closed cell foam at the front and back, allowing you the maximum freedom of movement to swim and perform a rescue. Should more buoyancy be required, an additional 290 N is available from a manually operated inflation chamber fitted with a 60 g CO₂ cylinder.

The Inshore 380N also comes complete with all the safety features you would expect from a professional lifejacket including twin flare pockets, integrated safety lines, spray hood and thigh straps.

FEATURES

- HYBRID AIR AND FOAM LIFEJACKET
- HEAVY DUTY COVER FOR DURABILITY
- INTEGRATED SAFETY ACCESSORIES FITTED AS STANDARD
- VERSATILE ADJUSTMENT SYSTEM ALLOWING IT TO FIT MOST BODY SIZES
- SPECIALIST LIFEJACKET FOR INSHORE & COASTAL RESCUE OPERATIONS
- DESIGNED WITH THE ROYAL NATIONAL LIFEBOAT INSTITUTION (RNLI)

Designed, tested and developed collaboratively with the RNLI - using RNLI crew members in testing.
