NOMENCLATURE

DESCRIPTION
This product is designed for safe work in heights and above free depth (eg work on roofs, platforms, scaffolds, pillars and masts ...). Its design provides the user with maximum comfort and a high level of safety. It is made of materials suitable for usual weather conditions and good working practices. The individual straps are combined to form a suitable unit in the event of fall arrest of the user.

Before using the product, please read this manual! Deviating from these instructions can have fatal consequences! Warning: Working and moving in height is a dangerous activity that requires thorough training and knowledge of the products used. The instructions in this manual describe the right steps to take care of your protective equipment, so avoid other procedures that may be incorrect and may endanger your life and health.

español

Antes de utilizar el producto, lea atentamente este manual. El incumplimiento de estas instrucciones puede acarrear consecuencias fatales. Advertencia: Trabajar y realizar movimientos en altura es una actividad peligrosa que requiere formación y conocimientos previos sobre los productos utilizados. Las instrucciones contenidas en el presente manual describen los pasos necesarios para el cuidado adecuado de su equipo de protección, por lo que deberá evitar otros procedimientos que puedan ser incorrectos o puedan poner en peligro su vida y su salud.

CONNECTION

WARRANTY

Fixe Climbing, S. L. provides a 3-year guarantee for this product. The warranty covers the quality of used materials and manufacturing deficiencies. It does not cover defects caused by normal wear, negligence, improper handling, improper storage, prohibited interventions, etc. Accidents caused by negligence and improper use of the product are not covered by this warranty.

PREVENTIVE AND PERIODICAL INSPECTIONS

Make sure that the recommendations for use with other protection devices of the fall protection system are met before use required by the regulations and safe working rules. All the means of the fall protection system that will be combined with this body harness, must be approved for use according to valid regulations. Be sure to check the suitability of their combination. Before using and after using the safety harness, perform a visual inspection and check the function of each part. During work, make sure that there is no damage to sharp edges or other dangerous exterior surfaces. If you find damage and any doubts about its faultless condition, it is imperative to discard it immediately. In the event of a fall, do not use this product anymore and send it for review or contact Fixe Climbing.

INSPECCIONES PERIÓDICAS Y PREVENTIVAS

Asegúrese de que se respetan estrictamente las recomendaciones de uso con otros dispositivos de protección del sistema de protección anti-caídas antes de utilizar el producto en las condiciones y normativas legales de seguridad. Antes de utilizar el producto, realice una inspección visual y una comprobación del funcionamiento de cada pieza. Durante el trabajo, realice una inspección visual y compruebe el funcionamiento de cada parte. Durante el trabajo, asegúrese de que no haya daños en bordes cortantes u otras superficies exteriores peligrosas. Si descubre daños o tiene alguna duda sobre el correcto funcionamiento del equipo, es imperativo que lo verifique inmediatamente. En caso de caída, no utilice más este producto y envíelo para su revisión o contacte con Fixe Climbing.

français

Veillez lire les présentes instructions avant d'utiliser le produit ! Danger de mort en cas de non respect de ces instructions. Avertissement : Travailler et se déplacer en hauteur est une activité dangereuse qui requiert un entraînement poussé ainsi qu'une connaissance affûtée des produits utilisés. Les instructions de ce manuel décrivent les étapes à suivre pour prendre soin de votre équipement de protection, évitez donc de suivre d'autres procédures qui pourraient être inadéquates et mettre votre vie et votre santé en danger.

ENTRETIEN

Nettoyez le produit sale dans de l'eau chaude (jusqu'à 30 °C) avec du produit nettoyant adapté au lavage à la main. Si votre matériel est sale, n'utilisez pas de désinfectant car il pourrait abîmer le matériel. En cas de pluie ou humidité, laissez le produit sécher naturellement dans une pièce ventilée à l'abri de toute source de chaleur directe, de toute flamme ou de la lumière du soleil. Conservez les parties métalliques après les avoir nettoyées et séchées à l'aide d'un produit adéquat.
