

Door Holder

DH1

Little tool, BIG help.

Specifications:

- 24" wide base, 10" tall vertical support.
- Holds door panels up to 3" thick.
- Made from durable, powder-coated steel.

Features:

- Perfect for holding doors on edge while routing, planing, and sanding.
- Fast to set-up and easy to use.
- Folds flat for compact storage.

Set-up:

- 1) Rotate flat bar stabilizer so it is 90° from base tube; 2) Loosen T-Screw to adjust; 3) Insert door panel between vertical support; 4) Close vertical support against door panel; 5) Hand-tighten T-Screw until snug.

All applications of the DH1 must be selected and deemed compatible with all relevant equipment by a Competent Person. Always take extreme care when operating machine tools. Never misuse or modify equipment. Never use for purposes of fall protection.
