

QuickSet Multi-Directional Baseplate

Part #: 15178

Compliant with all OSHA 1910 and OSHA 1926 Subpart M regulations.

Custom configurations not available.
Not repairable. Contact customer service for details.

QuickSet Multi-Directional Baseplate is suitable for the following applications:

QuickSet Multi-Directional Baseplate is intended for use in combination with the Guardian Fall Protection G-rail (6'/8'/10'/12') for use in Fall Prevention applications. Fall Prevention systems, such as a G-rail system, are used in place of, or in addition to, Fall Arrest or safety netting systems. Fall Prevention systems are placed around the leading edges of any and all fall hazards to which a worker may be exposed to prevent a worker from going over an edge, and are therefore considered to eliminate the hazard. G-rail systems **MUST ONLY** be used for Fall Prevention applications. Personal Fall Arrest, Restraint, Work Positioning, Climbing, and all other systems or applications must **NEVER** be connected to G-rail systems. Use of equipment in unintended applications may result in serious injury or death.

Materials: powder-coated steel.

Installation requirements set forth in G-rail product instructions must be adhered to. QuickSet Multi-Directional Baseplates must be positioned and used according to G-rail instructions. **ALWAYS** secure both guardrail legs with QuickSet Multi-Directional Baseplate locking pins.

Toeboards are required if any risk exists for equipment to fall to a lower level. Use with 2" x 4" lumber toeboard **ONLY**.

Maximum permitted slope: 1/12.
