

TRIPOD - heavy duty

ATR3

Portable tripod anchorage device for access and confined space rescue.

Features:

- Robust construction
- High maximum height
- 2 swivel attachment points
- 3 guying attachments
- Head locking point for legs
- Two section telescopic legs
- High visibility label

Box profile aluminium legs with steel head stock construction gives a rigid, durable product.

Two attachment points enables multiple users and flexibility during use e. g. for attachment of separate suspension and backup systems.

Swivel attachments will self orientate connectors to correct alignment.

Guying attachments give added stabilisation.

Head locking points allow the legs to be locked in place so that the tripod can be erected in a safe area and then moved easily into position.

Two section legs give compact storage.

Height: max 2.31m, min 1.6m
Stowed: 1.75m, 0.70m circumference

Specifications:

NB: specifications and colour may change without notice.

Size: Height max 2.31m - min 1.6m

EN Test Mass: n/a

Loading: 300kg with 10:1 safety factor

Conformity: EN 795 B 2013, 2 person

Materials: Steel headstock and alloy legs

Weight (kg): 21.00

Industries: Rescue and confined space access
