

## Scaffold hook, alloy pear + pin

CH06

### Large opening connector with twistlock gate

#### Features:

- Aluminium alloy
- Anodised
- Twistlock gate
- Gate opening: 54mm
- Overall size: L 240mm, W 135mm, Ø 16mm
- Captive bar option
- Compatible with heightec steplock hooks

Aluminium alloy for reduced weight.

Anodised for corrosion protection.

Twistlock gate requires 2 actions to open whilst allowing one handed operation. Self closing and locking.

Optional captive bar can be fitted by the user if required. The captive bar is used to fix the karabiner to the rope etc. to prevent loss or disassembly. It also keeps the loading close to the spine (thus reducing any loss in strength).

Can be attached to heightec steplock hooks when moving from stepbolts to cross arm or bracing.

#### Specifications:

*NB: specifications and colour may change without notice.*

Size: L 240mm, W 135mm, Ø 16mm

#### EN Test Mass:

Loading: 25kN major axis

Conformity: EN 362:2004/B

Materials: Anodised Aluminium alloy

Weight (kg): 0.36

Industries: Used in all work at height industries and rescue
