

FastClip transfer connector

CH141

Quick fit connector for transferring to and from offshore wind turbines.

Features:

- Allows rapid attachment and release
- One handed operation
- Closes and locks automatically
- Load indicator

Attachment

Gate mechanism is set in the open position, as the anchor point is placed in the mouth of the connector the mechanism is triggered, automatically closing and locking it.

Release

Both operating levers are pressed simultaneously to unlock and open the gate. Further pressure on the levers ejects the anchor point clear of the hook, even under moderate tension.

Lever are offset to prevent accidental operation.

Built in load indicator shows if hook has been overloaded.

None

Specifications:

NB: specifications and colour may change without notice.

Size: 140mm long x 80mm wide

EN Test Mass:

Loading: 24kN

Conformity: EN362

Materials: Aluminium alloy

Weight (kg): 0.25

Industries: Offshore wind, Oil and Gas
