

EDGE GUARD

Part of the rope and edge management range from Lyon Equipment

The EDGE GUARD's (patented) clever design combines a rope friendly contact surface with a strong angular shape to grip typical industrial plate edges.

Available in two versions, the LEG-10 for a single rope and the LEG-30 for two ropes.

[See overleaf for detailed product features](#)

LEG-30

CODE		OPERATIONAL WIDTH	MATERIAL(S)
LEG-10	EDGE GUARD	10cm	304 Stainless steel
LEG-30		30cm	

At Lyon Equipment, we design, manufacture and supply high quality and innovative, adventure, work at height and specialist rescue equipment - delivering expert advice on all our products and their applications

MADE IN THE UK

LEG-10

LEG-30

Product features:

- Versatile, compact and lightweight
- The angled end plates keep the rope and centre of gravity well within the footprint of the EDGE GUARD. This makes it very stable in use.
- When used on plate edges such as steel toe boards, the 'teeth' on the edge plates hook onto the edge with a camming action
- The more rope pressure applied to the EDGE GUARD, the more it grips onto the edge, reducing its potential for movement
- Each EDGE GUARD is supplied with adjustable securing cord and a spare length of securing cord
- Stainless steel body gives a long service life

For complete user instructions please visit www.lyon.co.uk/user-instructions

1. **Identify** the hazard
2. **Remove** the hazard
3. **Avoid** the hazard
4. **Protect** against the hazard
5. **Verify** the protection is appropriate

Always follow the **hierarchy of edge management**.

The EDGE GUARD is not a substitute for correct worksite hazard management.
