

The TerrAdaptor's™ ability to adapt for many advanced rigging situations sometimes demands a more advanced foot system and the Modular Foot System was developed to excel in those situations. Each foot in the system has between one and three high strength auxiliary attachment points which can be easily clipped into with a rescue carabiner, quicklink or tied direct. Feet attach to Modular Adaptors that can be positioned at 45 degree increments within either style of leg tube.

The TerrAdaptor™ Modular Foot System is also designed so that the legs of the TerrAdaptor™ become an integral part of the rigging rather than simply a means of supporting a high anchor point. When you securely anchor the feet at one of the auxiliary attach points you are also securing the head because force can be transmitted down the leg tube just as if it were a piece of rope, with the exception that the legs don't stretch.

The new Rocker Foot is the next generation of the Ball Foot – it provides more surface area on the ground than the previous Ball Foot.

Key Features:

Lean angles are greater • Three full-size lash points are standard • Lash points may be easily clipped at extreme lean angles

Height: 1.46" (3.7 cm)

Width: 2.40" (6.1 cm)

Length: 4.54" (11.5 cm)

Weight: 6.7 oz (191 g)

MBS: 30 kN (6744 lbf)

SM230500

A large, empty rectangular box with a thin black border, intended for handwritten notes or a signature.
