

FP05 - Cable Anchorage Sling

Collection: Anchorage Device

Range: Fall Protection

Materials: Steel Rope, PVC

Inner Pack: 20

Outer Carton: 80

Product information

Designed with a thimble loop on each end and protective plastic casing around the wire, the 1 metre steel sling allows for easy anchorage to a variety of structures.

Anchorage Device

Anchorage devices are common fall protection solutions in work areas that lack existing anchor points for personnel tie-off. They are certified to the EN 795 standard, making them approved anchor points for any elevated work area that poses a risk of fall to the worker. These points are responsible for connecting the user to a lifeline or lanyard making them must-haves for the safety of workers at height.

Fall Protection

Fall Protection is put in place to prevent the risks associated with falling from heights, reducing impact force, restricting obstacle/ground collision and restricting users from fall hazard areas. Portwest offer a full range of fall protection products for working at height.

Standards

EN 795 NONE

Features

- CE-CAT III
- Protective cover for longevity of the product
- Quick and easy installation
- Superior strength
- Suitable for a wide range of applications
