

**Product ID:**  
RGL9

**Product Name:**

Twin Leg Elasticated Webbing  
Lanyard & Shock Absorber

The RGL9 is a twin leg lanyard, the extra leg allows movement between anchorage points by means of double clipping. This system is generally used for tower climbing, steel erecting, scaffolding and maintenance to open structures.

The twin leg feature enables the user to always remain connected, therefore ensuring optimum safety. The elastic in the lanyard reduces the amount of hanging slack, which can help to reduce trip hazards and entanglement.

**Accredited to:**

EN 355:2002

**Material:**

35mm polyester

**Max arrest force:**

< 6 kN

**Fittings:**

RGK1 and any compatible EN362 connectors

**Length(s):**

1.15 - 1.8m

(Based on using RGK1 + RGK11)

**Features:**

Shock Absorber

Expanding Elasticated  
Webbing
