Customs no.:	63079098

Data sheet

ARG 110 ERGOTEC TWIN CLICK

The ARG 110 ERGOTEC TWIN CLICK is a partially elastic fall arrest harness with very high wearing comfort. It combines the freedom of movement and advantages of an elastic harness with the safety of static webbing. The wearer can no longer sink into the harness or tilt back too far. The elastic forearm belt secures the worker even in difficult, sideways hanging situations without exerting strong pressure on the chest. The aluminium fittings make the harness even lighter. Thanks to the practical click fasteners, the belt can be put on easily and quickly.

- high wearing comfort
- partly elastic for more freedom of movement
- secures even in difficult hanging situations
- Click fasteners for easy application

FEATURES
