Data sheet

IGNITE PROTON WIND

This completely equipped body and work positioning harness with synthetic sliding plate was specially designed with the wind energy sector in mind. It can be used in many other areas as well when top performance in safety and functionality are required. IGNITE PROTON scores with thermo-shaped hip padding that evenly distributes weight and is protected from wear and tear on the outside with a plate. The back cross also has a textile cover. The well-designed construction allows the fall-arrest attachment point to be perfectly positioned for the user. It also offers practical belt strap coilers to eliminate bulky excess length. Shoulder and leg padding can be laundered or replaced. Pre-formed gear loops and tool eyelets for different kinds of use make the harness a complete system.

- Better protection from wear and tear
- Thermo-shaped waist padding
- Replaceable shoulder and leg padding
