Data sheet

IGNITE RECORD szt

The comfortable complete sit harness with chest ascender and removable top part. RECORD is the only IGNITE harness that has a sports approval and all rope access equipment certifications. This gives it the lightness of a sports harness that can be used in tree care, industrial environments and leisure. IGNITE RECORD SZT is exactly right wherever fast operations without a lot of material are performed. It has breathable shoulder padding that can be easily replaced when worn out. Breathable leg, waist and back padding ensure good air circulation. The back band can be adjusted in length to provide the right shape for every body size. As with the other IGNITE harnesses, the fall-arrest attachment points are orange while the sturdy lateral attachment points are gray.

- Ultra-light and comfortable
- Removable top part
- Chest ascender, certified with 140 kg

Important note: May not be used with items from the older RECORD series (G-1110 - G-1115).
