Data sheet

DAREOS

The small DAREOS rope pulley is useful for a surprisingly diverse range of lighter weight applications. Its primary advantage over comparable products is the possibility of placing two carabiners on top of each other in the attachment opening.

- Smooth-rolling pulley for use in rope access technology, rigging, and rescue
- Large attachment point provides room for two carabiners, allowing a wide range of applications with a minimum of gear
- Low-friction polymer housing in the bearing
